CS 174 Milestone 1 Part B

Fall, 2014 (Dr. Chris Tseng)

Version 1.0: Dec. 1, 2014

Due: File upload by Mon., Dec. 8, 2014

Presentation on Tue. Dec 9, 2014 in class

You are assigned to validate the group according to the following.

Group 1 will validate Group 2
 Group 2 will validate Group 3
 Group 3 will validate Group 4
 Group 4 will validate Group 5
 Group 5 will validate Group 6
 Group 6 will validate Group 7
 Group 7 will validate Group 8
 Group 8 will validate Group 1

Validation of data and core features

For your assigned team, validate their prepared data and implemented features and comment on how they can improve or be corrected. Provide deducted points in red for each by following the suggested max score in parenthesis. Append the following with their report and indicate clearly **group X validate group Y**, X or Y=1, 2, ... ,7, on the first page of the integrated report.

Core Requirement

A. Data preparation(20%)

- A.1 Are you able to load their exported sql file and recover all the data? If so, how it can be corrected.
- A.2 Do you see any data that is either duplicated, with lower than 50,000 view counts, or not in the assigned domain?
- A.3 Are you able search and find videos matching your keywords?
- A.4 Are you able to edit the video info after you login as an admin? How would you suggest them to improve the editing feature?

B. Login/Registration(20%)

- B.1 Are you able to register an account and subsequently login?
- B.2 Does the system enforce on minimal of 8 characters and at least one number and one letter in the password field? If not, what constraint(s) is not in place?

C. Cookies for login(20%)

- C.1 Do you see a checkbox or similar for user to turn on and off the cookie function?
- C.2 Is login info stored and valid when Cookies are turned in C.1? What problem did you see and how would you suggest them to improve it?

D. Favorite videos(20%)

- D.1 Are you able to select your favorite videos? Can you select more than one?
- D.2 Do you see personalized favorite videos when you login under different accounts?
- D.3 Upon login, do you see your favorite videos displayed as icon images that is hylinkable to the original Youtube videos
- D.4 What problem did you see and how would you suggest them to improve it?

E. Report (20%)

- E.1 Is the report template used in their report?
- E.2 Do you find workflow describing each features with matching screenshots

E.3 Do you find anything missing or poorly presented in this report? If so, how can they improve it?

E.3 Do you find their design user friendly or difficult to navigate? What suggestion do you have for them to improve on their user interface and workflow?

What to turn in (No hard copy needed):

Each team as whole should do the following:

1. Provide a Word report on your finding and a Powerpoint slide to be presented in class on the due date. List your team members and team name on the first page of both your report and your Powerpoint slide. Integrate everything into one report with clear sections and chapters in the table of content at the beginning of your report.
2. Provide a contribution summary of who did what for this milestone.
3. Name your files precisely as GXValidateGY.doc (or ppt), where X is your group number and Y is the group number that you are assigned to validate.

Upload the files above to your Canvas account by 11:00 PM, of the due date.

Points maybe deducted if you don't follow the rules listed above.

Each individual should provide the following:

Submit your self-appraisal form and log into peer evaluation site to offer your peer evaluation and by 11:00 PM on the file upload due date.

Grading policy:

The project will be graded when it is completed according to the grading policy posted in your CS174 Canvas account.
